JCA100H

DESIGN BY: **SOLDANO**

Two switchable Channels, including the often imitated, often modeled, yet never matched SOLDANO OVERDRIVE CIRCUIT. Four 6L6 tubes, beefy custom-wound transformers and a solid-state rectifier keep it tight and punchy, even at skirt-shredding volumes. The Normal channel has plenty of headroom to deliver everything from clear, bright cleans to muscular metal riffs. The Overdrive channel is the circuit that made Soldano famous; the real-effing-high-gain-deal.

- 100 watts - all tubes.
- Optocoupler seemless switching
- Tube-driven effects loop
- 5x12AX7 ★ 4x6L6 Tubes
- 3-Band EQ with Presence Control
- Footswitch included

ESTIMATED STREET PRICE:

$899.99 USD
