

# SC600 - FET condenser microphone

UK

This type of microphone offers transformerless output circuit design for exceptional low self-generated noise, increased dynamic range, enhanced low and high end response with improved linearity across the frequency range combined with maximum SPL capacity. The SC600 comes with a selectable low-cut filter and omni-directional or cardioid polar patterns. It utilizes carefully selected Field Effect Transistors (FET), specially chosen for their low distortion and superior S/N ratio. The SC600 is the perfect choice for home recording studios and stage amplifying.

Frequency response	30 - 20.000 Hz
Polar pattern(s)	cardioid • omni-directional
Sensitivity (@ 1 kHz, 94 dB S.P.L.)	10 mV/Pa
Rated impedance	200 $\Omega$
Equivalent noise level	20 dB (A-weighted IEC 651)
Max S.P.L. for 0.5% THD @ 1 kHz	138 dB
