Waves iGTR is a powerful personal guitar processor that features an exceptional selection of virtual amps and effects. Pocket-sized and easy-to-use, iGTR allows a guitarist to plug in and play cutting-edge guitar tones through headphones or external speakers.

With amplifiers and effects drawn from our award-winning GTR Guitar Tool Rack developed in association with Paul Reed Smith, iGTR delivers outstanding guitar sound in a portable, intuitive, and affordable module.

iGTR features:

3 Virtual Amps with Adjustable Drive

- Warm
- Normal
- Bright

3 Variable Speed Modulation Effects

- Phaser
- Tremolo
- Wah

3 Tweakable Ambience Effects

- Reverb
- Chorus
- Delay
